

A Vision To complete Solutions

EPROX

provides fully integrated engineering, procurement, purchasing for project's materials, and services for the petroleum, petrochemicals, power, and other related industries in Egypt, MENA region and worldwide.

2022

Targeting emissions worldwide

The UK's leading LDAR Company with over 20 years' experience managing programs around the world.

An LDAR program is the system of procedures a facility implements to locate and repair leaking components, including valves, pumps and connectors.

Benefits of an LDAR Program:

LDAR Envelope environmental solutions are designed to ensure that our clients reduce their environmental impact by minimizing the release of airborne pollution and contaminants.

Excellent financial payback.

Eprox act as an exclusive agent for Phoenix in Egypt

Phoenix supply a diverse range of products including safety products. Phoenix also the market leader in the provision of emission reduction programs. Our product and services are widely specified within a range of industrial sectors including oil and gas, chemical, nuclear, pulp and paper, power generation and original equipment manufacturing.

Fingersaver

Description:

The Fingersaver is designed to prevent finger injuries by keeping hands away from the impact position of the hammer on flogging spanners, and from pinch points when using impact wrenches and hydraulic torque equipment.

Application:

Every day, throughout industry, people sustain preventable hand and finger injuries. The Fingersaver was developed to reduce the risk of injury during flange joint assembly by securely supporting or holding large spanners or flogging spanners in place during the removal of nuts and bolts.

Cable Tidy

Description:

The Cable Tidy is an innovative tool designed to keep all types of hoses and cables off the ground, reducing trip hazards, and resulting in a safer environment for all employees.

Application:

The Cable Tidy ensures that shutdown hose and cable runs are stored neatly and prevents trip hazards from cables on the ground. The tool fits tightly over scaffold poles and handrails and so prevents inadvertent removal or the tool.

Tool Lanyard

Description:

The Tool Lanyard is a safety product made from a 1m long tough seat belt webbing material, that can be attached to hand tools to prevent them falling to the ground when working at height.

Application:

The Tool Lanyard is used when working from heights. It is designed to attach easily to tools so that they will not fall to ground if dropped. This simple safety measure minimises the risk of serious injury to those working below.

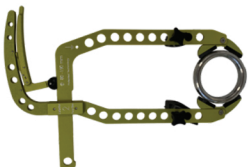

Lobster Tool

Description:

The Lobster tool is a new and innovative product that is designed to safely and precisely install gaskets subsea. It is manufactured from lightweight anodically treated, high tensile aluminium and is easy to use, ensuring the gasket is held firmly in place. The Lobster tool is reusable and built to last and so only needs to be purchased once.

Application:

The Lobster tool minimises the risk of injury to hands, fingers and arms when installing gaskets both subsea and on-ground. There are 7 tools within the range and these fit all gasket sizes from 1/2" to 36". The tool is easy to insert from any radial position and provide divers with a tool they can trust.

Scan me

Benefits:

- A proven track record in delivering a safer working environment.
- Designed to prevent injury when working on site.
- Widely specified throughout the world.
- Ensures a safer, working environment for all.
