EPROX

provides fully integrated engineering, procurement, purchasing for project's materials, and services for the petroleum, petrochemicals, power, and other related industries in Egypt, MENA region and worldwide.

The safety, efficiency and economic viability of the oil and gas industry relies greatly on the transport and transfer of fluids from wellheads, through offshore process system piping and pipelines to refining facilities.

Regular inspection of pipeline and process pipework can uncover defects or leaks that require modification or repair.
